### **EXAMINER'S AMENDMENT**

a. Pursuant to BPAI decision rendered 8/16/2006, an examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

b. The application has been amended as follows:

Please cancel claims 3, 5-6, 9-13, 16, 18-22.

Please replace claims 4, 7-8, and 14-15 with the following:

4. A computer implemented user interface, comprising:

a markup-language encoded template having a replacement variable within; and  
a plurality of resource files containing data for replacing said replacement variable, said replacement variable being selectively replaced by data from a selected one of said resource files, each of the plurality of said resource files containing an idiomatically-correct predefined passage of text in a different language such that said replacement variable will always be replaced with a respective said passage of text governed by the selection of a particular one of said resource files; wherein  
said particular one of said resource files is selected according to a language code.

7. A computer implemented user interface, comprising:

a markup-language encoded template having a replacement variable within; and  
a plurality of resource files containing data for replacing said replacement variable, said replacement variable being selectively replaced by data from a selected one of said resource files, each of the plurality of said resource files containing an idiomatically-correct predefined passage of text in a different language such that said replacement variable will always be replaced with a respective said passage of text governed by the selection of a particular one of said resource files; wherein

a constructed markup-language code is built at a server by combining said markup-language encoded template and data from said resource file.

8. The user interface of claim 7, wherein:

the server builds the constructed markup-language code by substituting said replacement variable with data from said resource file.

14. A method for constructing a web based user interface, comprising:

providing an HTML template to a server, said HTML template including at least one variable;

providing a plurality of data files to the server, each of said data files having therein a different language data portion corresponding to said variable, the data portion comprising idiomatically-correct predefined content;

selecting one of said plurality of data files; and

Art Unit: 2176

constructing an HTML encoded user interface file by always substituting the same data portion from the selected one of said plurality of data files into said HTML template to replace said variable; wherein

a language code is sent from a browser to the server; and

the one of said plurality of data files is selected according to the language code.

15. The method of claim 14, wherein:

the language code is selected to indicate a particular language such that the one of said plurality of data files is selected according to the language desired.
